85% of all drivers travel at the speed they are most comfortable. This is known as the 85th percentile speed which is determined by a traffic study. The 85th percentile speed is typically used as actual posted speed limit. Raising or lowering the speed limit is only warranted by a traffic engineering study.

Based on national research, 25 mph is the slowest drivable speed without having to "ride the brakes," therefore is the lowest posted speed limit allowed by Greenville County.

ROAD REQUESTED FOR SPEED LIMIT EVALUATION

FOR OFFICE USE ONLY

EVALUATE DURING SCHOOL (SEPTEMBER – MAY)

DIST	RD ID	LENGTH	PS L	ADT	85 ^t _h	NEW SL
