All Residential Single Family, Multi- Family and Residential Addition/ Alteration Permit Holders –

Due to a reduction in our inspection staff, please be aware that the Building Safety Division will be conducting Combination Inspections - all trade rough-in inspections (Electrical, Fuel- Gas, Mechanical and Plumbing) at the same time. Please arrange to schedule your Rough- in inspections for the same day.

Once the trade inspections have successfully been passed, you may then schedule the Building Framing Inspection.

Permanent Power and Gas Release (cold months only) may be scheduled after the Framing has passed and the sheetrock has been installed.

Final Inspections will be done together (Building , Electrical, Gas, Mechanical and Plumbing)

We thank you for your cooperation in this matter.

County of Greenville Building Safety Division
