MARIETTA, SC 29661**

10/18/2016

County of Greenville  
Community Project:

With our department being one of the lowest budgeted departments in the County of Greenville, it is difficult for us to be able to afford a necessary incident reporting and station management software. With the help of the community project funding, we would be able to offer our personnel access to the necessary software to accurately input required federal data that is necessary for assistance grants. This software will assist our community by accurately reporting required data to FEMA allowing our department to apply for more federal funding. The most cost effective software we have found is emergency reporting, this system is utilized by most off departments in Greenville County.

Emergency Reporting is the easiest and most accurate incident reporting and records management solution on the market. More than 69,000 first responders use Emergency Reporting including many Department of Defense agencies. Emergency Reporting is a cloud based system (online) which would help reduce extra cost of equipment and up keep for our department. With the ability to access data online from anywhere, unlimited users (reducing cost of extra license) and automatic updates and database updates. This system would allow for all of our personnel to easily access and input incident response data.

With the assistance of the County we feel this project will be a great success for not only our department and personnel, but for the community as a whole.

Thank You:

Daniel Wright
