APPLICATION FOR COUNCIL GRANT ASSISTANCE WITH LIFE SAFETY WATER LINE INSTALLATION

Applications will be based on health and life safety issues that include contaminated/non-potable wells, dry wells and fire protection. Greenville County Public Works Department, Engineering Division, will take applications for Council Grant Assistance with Life Safety Water Line Installation. Applications will be reviewed and scored by the Facilities Project Manager, Assistant County Administrator for Public Works, and the Engineering Division for completeness and criteria and will be submitted to Public Works, Planning and Development Committee for consideration on a first come, first serve basis.

This is a 50/50 grant program; therefore, the County of Greenville, upon approval by County Council, will provide 50% and the applicant will provide the other 50% for the installation of the water main and/or fire hydrant down the public road. The applicant has 60 days to secure their portion of the funding and remit to the County of Greenville. The respective property owners are responsible for the tap/meter fee and connection to the dwelling.

Applicant's Name John R Mills jr. Phone Number (864) 325-7667
Street Address 117 Reedy Acres Dr. Simpsonville, S.C. 29681
Mailing Address (if different) _____

Specific detailed information concerning this request:

- What type of assistance is needed water line grant assistance

To Whom It May Concern,

I'm applying for the grant to get help with the water situation at the address of 117 Reedy Acres Drive. I need this help because this would be well number three for this address. The well that is on the property now produces water that has a foul smell and is cloudy. It has been tested and determined to be ok but it not appealing to the look, smell or taste. For the smell I was advised to pour bleach in the well but I am not comfortable using this method. It is because of the drilling and cost associated with trying to locate water on the property that I need to be able to access city water for consumption, bathing and also for the comfort in not having to worry about not only what I'm putting in my body but also water freezing in the winter causing yet other problems in not only having water to drink but also replacing pipes that burst because of cold temperatures which also has been a problem in the past. City water would be cost effective in so many ways. Receiving this grant would enable me to have access to clean water that would be in my best interest concerning my health and well-being as a home owner.

Thank you for your consideration,

John Mills

Dear Mr. Mills:

This refers to your request for an estimate for a water main extension to serve the above referenced property.

According to our measurements, a water main could be extended 255 feet along Reedy Acres Dr to serve the property. The applicant is required to advance funds for a water main installation at \$30 per foot under a standard Installation Agreement with the Commission. Accordingly, your project cost would be 255 feet at \$30.00 per foot for a total of \$7,650. Price and policy are subject to change without notice.

In addition to the cost of the main extension, the requesting party must pay standard connection fees to Greenville Water (see <http://www.greenvillewater.com/development-fees/>) and all applicable plumbers' fees.

Please contact us at your earliest convenience if you would like to proceed with this project.

If we can be of further assistance, please let us know.

Sincerely,
Susan Overstreet
