RE: Road Length Adjustments at the Greenville/Laurens County Line

The South Carolina Revenue and Fiscal Affairs Office re-established the Greenville/Laurens County line in 2019. This changed the lengths for the following Greenville County roads.

The “Map Lengths” and “Beginning/Ending Points” shown below reflect the *actual* length and beginning/end points. I recommend that the Road Inventory Length be changed to coincide with the new Greenville/Laurens County line as shown below. The net addition to the inventory is 6,034 feet or 1.14 miles.

Road Name	From	To	Old Length	New Length	Additional Length
