

County of Greenville

"... At Your Service"

**ADDENDUM #4
Energy Efficiency Project Manager
RFP #12-11/11/09**

ISSUED: November 6, 2009

NOTICE TO VENDORS:

The following revisions, additions, and clarifications are hereby made part of the Contract Documents for the above-referenced project and shall be taken into account in the preparation of all Responders and executioners of all Work. Responders shall acknowledge receipt of the Addendum in their response.

1. A listing of County facilities associated with the energy audit has been added to this RFP as Attachment D – County Facilities. The list is attached to this addendum.

2. Section IV. Scope of Work, subsection G. Equipment and Disposal shall read:

Greenville County reserves the salvage rights to all parts and equipment; however, if those rights are relinquished, vendor will be responsible for the disposal and must abide by the Greenville County Waste Stream Plan.

3. A copy of the Greenville County Waste Stream Plan has been added to the RFP as Attachment E and is attached to this addendum.

Greenville County Waste Stream Plan

As projects are planned, all existing materials/equipment to be removed will be categorized into one of the following: salvageable, non-salvageable, or hazardous waste. Based on the classification of the waste it will be disposed in the following manners:

1. Salvageable

- a. Salvageable materials will be determined by available markets at the time of the project. Materials may include but not be limited to a variety of metals, cardboard, and fluorescent tubes.
- b. All salvageable metals will be containerized at the project site until a sufficient quantity is accumulated to warrant transport to a reputable scrap metal vendor. Bills of lading will be used to document the materials taken and the weight salvaged.
- c. All materials containing refrigerants will be handled with care to prevent the involuntary release of hazardous gases. The refrigerants will be recovered whenever possible in accordance with the Clean Air Act requirements. Once recovered, the remaining metals will be salvaged.
- d. Fluorescent tubes will be carefully stored to prevent breakage prior to transport by a reputable recycling vendor. Bills of lading will be used to document the quantity and size of tubes recycled.

2. Non-salvageable

- a. Non-salvageable items may include but not be limited to wood, sheetrock, plastic, and packing materials.
- b. Care will be taken to segregate building materials from putrescible wastes.
 1. Inert, uncontaminated building materials will be disposed at a Class II landfill permitted by the South Carolina Department of Health and Environmental Control (SCDHEC).
 2. Putrescible wastes will be disposed at a Class III landfill permitted by SCDHEC.
 3. The County does operate both types of landfills and these facilities would be available for disposal. Both the Class II and Class III landfills are located at 11705 Augusta Road, Honea Path, SC 29654.
- c. Weight tickets will be used to document final disposal for all non-salvageable wastes.

3. Hazardous

- a. Hazardous materials may include but shall not be limited to PCB-containing light ballasts, refrigerant, and used oil.
- b. All hazardous materials will be containerized to prevent spillage. A SCDHEC certified hazardous materials handling vendor will be contracted to transport and dispose of the collected items.
- c. Greenville County currently contracts with Santee Cooper to provide recycling for used oils. These oils will be containerized at the project site prior to transport by Santee Cooper.

All waste disposal must be certified by the contractor to Greenville County. Certification documentation may include bills of lading, weight tickets, or other approved documentation. Certification must include quantities and final salvage or disposal locations.
