

(190) The Kingstree 110 KV single-circuit transmission line extending from the Company's Florence-Greeleyville 110 KV Line near Greeleyville, South Carolina, to the Company's Kingstree 110 KV Station near Kingstree, South Carolina, a distance of 10.16 miles.

(191) The Cherry Point-Morehead 110 KV single-circuit transmission line extending from the Company's Cherry Point 110 KV Station at Cherry Point, North Carolina, to the Company's Morehead 110 KV Station at Morehead City, North Carolina, a distance of 20.51 miles.

(192) The Jonesboro 110 KV single-circuit transmission line extending from the Company's Cape Fear-Tillery 110 KV Line near Sanford, North Carolina, to the Jonesboro 110 KV Station near Jonesboro, North Carolina, a distance of 4.02 miles.

(193) The Kinston 110 KV single-circuit transmission line extending from the Company's Wommack 110 KV Station near Kinston, North Carolina, to the Company's Kinston 110 KV Station, a distance of 4.98 miles.

(194) The Cape Fear-Method 110 KV South single-circuit transmission line extending from the Company's Cape Fear Steam Electric Generating Station near Moneure, North Carolina, to the Company's Method 110 KV Station in Raleigh, North Carolina, a distance of 29.34 miles.

(195) The Cape Fear-Fort Bragg 110 KV single-circuit transmission line extending from the Company's Cape Fear Steam Electric Generating Station near Moneure, North Carolina, to the Company's Fort Bragg 110 KV Station at Fort Bragg, North Carolina, a distance of 31.29 miles—under construction.

(196) The Sumter-Northside 110 KV single-circuit transmission line extending from the Company's Sumter-Bishopville 110 KV Line near Sumter, South Carolina, to the Company's North Sumter 110 KV Station near Sumter, South Carolina, a distance of 2.08 miles.

(197) The West Asheville-Vanderbilt 66 KV single-circuit transmission line which taps an existing 66 KV Line at a point 1.28 miles

from the Company's West Asheville 110 KV Station in Asheville, North Carolina, and extends to the Company's Vanderbilt Station in Asheville, North Carolina, a distance of 1.35 miles.

(198) The Elk Mountain-Vanderbilt 66 KV single-circuit transmission line which taps an existing 66 KV line at a point 2.33 miles from the Company's Elk Mountain Steam Electric Plant near Asheville, North Carolina, and extends to the Company's Vanderbilt Station in Asheville, North Carolina, a distance of 1.96 miles.

(199) The Oerlikon 66 KV single-circuit transmission tap line extending from the Company's West Asheville-Swannanoa 66 KV Line near Swannanoa, North Carolina, to the Company's Oerlikon 66 KV Station near Swannanoa, North Carolina, a distance of 2.31 miles.

(200) The Goldsboro City South 66 KV single-circuit transmission line which taps the Goldsboro-Mount Olive 66 KV line near Goldsboro, North Carolina, and extends to another 66 KV line (thereby providing a loop feed to the 66 KV substations in Goldsboro, North Carolina), a distance of 5.78 miles.

(201) The Westinghouse 66 KV single-circuit transmission line extending from the Company's Raleigh-Northside 66 KV tie line to the Company's Westinghouse 66 KV Station near Raleigh, North Carolina, a distance of 2.93 miles.

(202) The Burlington Hosiery 66 KV single-circuit transmission line extending from the Company's Asheboro Weaving Mill 66 KV tap line near Asheboro to the Company's Burlington Hosiery 66 KV Station near Asheboro, North Carolina, a distance of 1.15 miles.

(203) The Newton Grove 66 KV single-circuit transmission line extending from the Company's Goldsboro Steam Electric Generating Station to the Company's Newton Grove 66 KV Station near Newton Grove, North Carolina, a distance of 18.61 miles.

(204) The Spring Hope 66 KV single-circuit transmission line extending from the Company's Stallings 66 KV Station near Stallings, North Carolina, to the Company's Spring Hope 66 KV Station near Spring Hope, a distance of 11.46 miles.
