5. GRANULARITY AND PARTITION

(A) Regular Increases. At first the monthly monthly payments will be in the amount of U.S. \$ 556.95, and each anniversary of the date my first monthly payment is due, up through the twentieth year that the loan is outstanding, I will begin paying a new monthly payment which will be equal to the amount I have been paying multiplied by the number 1.075, unless I exercise the "Monthly Payment Freeze Option" or "Full Payment Option" as described in Section 5(B). Beginning in the twenty-first year and for the remaining term, I must pay the Full Payment Amount. I will pay the new amount of my monthly payment until it changes in accordance with this Section 5 or Section 6 or 7 below.

(B) Monthly Payment Freeze Option. Instead of having my monthly payments increase during the second and third years that my loan is outstanding, I may elect to have my monthly payment frozen for the second and/or third years that the loan is outstanding at the monthly payment amount due during each respective preceding year. Alternatively, I may elect to have the Note Holder recalibrate my Full Payment Amount as described in Section 5, and I will then make payments of the Full Payment Amount beginning with the first monthly payment due after my election, on the third and on each subsequent anniversary of the date my first monthly payment is due until, but not including, the twentieth anniversary date. I may only choose to have my payment adjusted in accordance with Section 5(A) or make the Full Payment Amount. Beginning with the twenty-first year and continuing through the term of the loan, I will pay the Full Payment Amount. The Note Holder will notify me (as provided in Section 5 below, prior to each of the anniversaries of the date my first monthly payment is due and will inform me that I have the options set forth in this Section 5, subject, however, to the limitations imposed by Section 6(C)). I must notify the Note Holder of my election prior to the date that the first monthly payment is due after the respective anniversary date. If I do not choose from the options I have under this Section 5(B) prior to my first two anniversary dates, I will make the payments provided for in 5(A). If, after my second anniversary or for any subsequent anniversary date until, but not including, the twentieth anniversary date, I feel a change in circumstance between the adjustment provided for in 5(A) and the Full Payment Amount, I will pay the Full Payment Amount.

3. WHAT HAS TO BE MADE PREVIOUSLY KNOWN

...and differences to my last post from April 1st please

and if my monthly payments would be less than the amount of the interest portion of a monthly payment which then would be sufficient to pay off my unpaid principal balance in full on the maturity date at my current rate of interest in substantially equal payments. If so, each month that the amount of my monthly payment is less than the interest portion, the Note Holder will subtract the amount of my monthly payment from the interest portion and will add the difference to my unpaid principal balance. The Note Holder will also add interest on the interest balance as provided for in the rate specified by Section 2 above.

Relationships on the Current Principal Balance

The monthly payment could be greater than the amount of a monthly payment which would be sufficient to repay my unpaid principal balance in full on the maturity date at my current rate of interest on substantially equal payments. If so, the Note Holder will deduct the difference from the unpaid balance of my Note, and add onto the next interest charge date is if I had made a partial prepayment under Section 8 (of the Note).
