~~CONSTRUCTION~~
1.7.1 The Design Development Documents shall contain drawings for each floor and for the entire building showing all elements of architectural, structural, plumbing, electrical, elevator, heating, ventilating and air conditioning, and all other mechanical requirements, and all other components necessary to renovate the Building; all in such detail to show the reader the work to be done without outside explanation or reference to any other document except the specifications. The Design Development Documents shall contain a bound set of specifications setting forth the nature, number, and description of all components of the work, including all materials, together with a detailed materials list itemizing all components of the work.
