(A) Change Dates

The Interest rate I will pay may change on the first day of May , 1985, and on that day every 12th month thereafter. Each date on which my interest rate could change is called a "Change Date."

(B) The Index

Beginning with the first Change Date, my interest rate will be based on an index. The most recent index figure available as of the date 45 days before each Change Date is called the "Current Index."

If the index is no longer available, the Note Holder will choose a new index which is based upon comparable information. The Note Holder will give ne notice of this choice.

The first index figure for this note is 10.760. It is called the "Original Index."

The Original Index plus a margin of 3.000 \$ (after rounding the result up to the nearest 1/8 of 1\$) is called the "Adjustment Base Rate."

the Note Holder than the Original Index. If the Current Index is higher than the Original Note Holder will add the difference to the Adjustment Base Rate. If the Current Index is lower than the Original Note Holder will subtract the difference from the Adjustment Base Rate. The Note Holder will then round Index, the Note Holder will subtract the difference from the Adjustment Base Rate. The Note Holder will then round the result of this addition to the nearest 1/8 of 1 percentage point (0.125). Subject to the limits stated in Section 4 (D) below, this rounded amount will be my new interest rate until the next change date.

The Note holder will then determine the amount of the monthly payment that would be sufficient to repay the unpaid principal balance of my loan I am expected to one on the Change Date in full on the maturity date at my new interest rate in substantially equal payments. The result of this calculation will be the new amount of my monthly payments.
