

(d) All future private lines constructed within the District shall be built in accordance with the specifications governing the original water lines of the District. Such lines shall be laid out by a competent engineer and shall be approved by the Engineer for the District. These lines shall be of such size as will tie in with the future expansion of the District and also of such size as to provide fire protection, when required. Fire hydrants, valves, etc., shall be installed as part of said private lines.

(e) The owner will not, or permit anyone acting for him, represent to anyone that he or they are in anywise agents for the District and such owner shall understand that he has no power or right to make promises, representations or commitments which will bind the District.

(f) The owner will abide by all of the rules, regulations, orders, by-laws and amendments thereto of the District. As used in these regulations, the singular shall include the plural and the plural shall include the singular whenever applicable. This agreement shall apply with equal force where the owner is other than an individual. As used in this regulation, the term "owner" is applicable to individuals, groups of individuals, corporations or other entities now owned or in the future constructing private or subdivision water lines.

(g) In the event of violations of any of the terms or conditions of these regulations, the District shall have the right without liability therefor to disconnect the water tap provided by the owner after ten (10) days notice in writing addressed to the owner at his last known address.
