RE: M.D. Earle Property
O.E. Job No. 80085

Dear Mr. Carter:

I would like to confirm our continued effort in the design development of the M.D. Earle property for U.S. Shelter Corporation. The architect's preliminary layout appears to be compatible to the storm retention design anticipated.

The two areas for our retention basin can be achieved with minor adjustment of the residential units.

If we can be of further assistance please contact us.

Sincerely,

O'NEAL ENGINEERING, INC.

Barry A. Harms
