

## Mississippi

Two 36-inch and two 42-inch main line loop sections in Mississippi, totaling approximately 32.23 miles in length, described as follows:

(a) One 36-inch main line loop (line "C") section, approximately 0.88 miles in length, beginning at the east end of the existing loop at approximate mile post 647.20, located in Section 16, T-2-N, R-8-E, and continuing in an easterly direction to the end of the loop section at approximate mile post 648.05, located in Section 9, T-2-N, R-8-E, all in Pike County, Mississippi. Included in this loop section is a double cross-over to lines "A" and "B" at the end of the loop.

(b) One 36-inch main line loop (line "C") section, approximately 13.62 miles in length, beginning at approximate mile post 648.05, located in Section 9, T-2-N, R-8-E, Pike County, and continuing in an easterly direction to the west end of the existing loop at Compressor Station 70, located in Section 9, T-3-N, R-10-E, Walthall County, all in the State of Mississippi.

(c) One 42-inch main line loop (line "D") section, approximately 15.18 miles in length, beginning at approximate mile post 725.36, located in Section 35, T-9-N, R-13-W, and continuing in an easterly direction to the end of the loop section at Compressor Station 80, located in Section 24, T-10-N, R-11-W, all in Jones County, Mississippi. Included in this loop section are a main line valve with double cross-overs to lines "A", "B", and "C" at the beginning of the loop section, and a main line valve and scraper trap assembly with tie-over to the existing suction line at Compressor Station 80.

(d) One 42-inch main line loop (line "D") section, approximately 2.55 miles in length, beginning at approximate mile post 775.79, located in Section 19, T-2-N, R-18-E, and continuing in an easterly direction to the Mississippi-Alabama State Line. Included in this loop section is a main line valve with cross-overs to lines "A", "B", and "C" at the beginning of the loop section.

## Alabama

Four 42-inch main line loop (line "D") sections in Alabama, totaling approximately 51.20 miles in length, described as follows:

(a) One 42-inch main line loop (line "D") section, approximately 14.54 miles in length, beginning at approximate mile post 796.71, located in Section 3, T-13-N, R-2-W, Choctaw County, and continuing

in an easterly direction to the end of the loop at Compressor Station 90, located in Section 11, T-14-N, R-1-W, Marengo County, all in the State of Alabama. Included in this loop section are a main line valve with double cross-overs to lines "A", "B", and "C" at the beginning of the loop section, and a main line valve and scraper trap assembly and a main line valve with a partial by-pass at Compressor Station 90.

(b) One 42-inch main line loop (line "D") section, approximately 14.71 miles in length, beginning at approximate mile post 875.80, located in Section 35, T-19-N, R-11-E, Dallas County, and continuing in an easterly direction, crossing Autauga County, to the end of the loop section at Compressor Station 100, located in Section 36, T-20-N, R-13-E, Chilton County, all in the State of Alabama. Included in this loop section are a main line valve with double cross-overs to lines "A", "B", and "C" at the beginning of the loop section, a main line valve and scraper trap assembly with tie-over to the existing suction line at Compressor Station 100, and a 36-inch by-pass with a valve assembly at Compressor Station 100.

(c) One 42-inch main line loop (line "D") section, approximately 7.45 miles in length, beginning at the Mississippi-Alabama State Line, and continuing in an easterly direction to the end of the loop section, located in Section 36, T-13-N, R-4-W, all in Choctaw County, Alabama.

(d) One 42-inch main line loop (line "D") section, approximately 14.50 miles in length, beginning at approximate mile post 858.68, located in Section 6, T-17-N, R-9-E, and continuing in an easterly direction to the end of the loop section, located in Section 5, T-13-N, R-11-E, all in Dallas County, Alabama. Included in this loop section is a main line valve with cross-overs to lines "A", "B", and "C" at the beginning of the loop section.

## Georgia

Four 42-inch main line loops in Georgia, totaling approximately 59.02 miles in length, described as follows:

(a) One 42-inch main line loop (line "D") section, approximately 13.12 miles in length, beginning at approximate mile post 1035.26, located in G.M.D. 1248, Fayette County, and continuing in an easterly direction, crossing Clayton County, to the end of the loop section at approximate mile post 1048.34, located in G.M.D. 775, Henry County, all in the State of Georgia. Included in this loop section is a main line valve and scraper trap assembly with tie-over to Station 120 suction line at the end of the loop section.
