Make your world a colorful place:
play it safe by knowing the air quality
charts and what each color means.

"Colorful Casa" by Grant

Match the concept with the definition.

- a) Particle matter _____ We can do this to our cars to reduce emissions, improve car performance, and improve air quality.
- b) Ozone _____ An activity banned in South Carolina, which burns certain materials.
- c) Top off _____ When the levels of this pollutant are high, it is bad for our lungs.
- d) Breathe _____ They come from factories and vehicles' exhaust pipes.
- e) Weather forecast _____ Very tiny substances that can get deep into our lungs, causing damage if we breathe them.
- f) Pollution _____ A condition of the respiratory system that makes breathing difficult.
- g) Car maintenance _____ We need to do this to improve our air quality.
- h) Open burning _____ The Air Now website where we can obtain the Air Quality Index/Forecast.
- i) Inflate _____ A prediction of the weather for the next few days.
- j) Carpool _____ We can change these to help improve air quality in Greenville County.
- k) Idling _____ Contamination of air, water, and soil.
- l) Asthma _____ We can ride these to school, work, or other places.
- m) Clean air _____ We need to do this regularly to our car tires to increase vehicle performance and reduce emissions.
- n) Emissions _____ We all need this to live a healthy life.
- o) <http://airnow.gov/> _____ We do this when we ride together with other people to school, work, or other places.
- p) Take action to "Spare the Air" _____ We need to do this through our noses to live.
- q) Bicycles _____ We let our cars do this when the engine is running but the vehicle is not moving, and it is bad for air quality.
- r) Habits _____ We usually do this after the gas pump stops automatically, and it is not good for the car and the environment.

Critical Thinking: True or False

- | | | |
|---|------|-------|
| 1) When vehicles are not properly maintained, they produce more emissions and pollute more of our air. | TRUE | FALSE |
| 2) It is fine to burn dead animals, construction debris, paper, household chemicals, tires, and treated wood in South Carolina. | TRUE | FALSE |
| 3) When the air quality forecast is red, the air is good and it is not bad for our lungs. | TRUE | FALSE |
| 4) Emissions come from factories and vehicles' exhaust pipes. | TRUE | FALSE |
| 5) Particle matter 2.5 (PM 2.5) are very tiny substances that are not harmful and do not cause damage to our lungs. | TRUE | FALSE |
| 6) Asthma is a condition of the respiratory system that makes breathing difficult and gets worse when ground level ozone and PM2.5 measures are high. | TRUE | FALSE |
| 7) Taking action to "Spare the Air" will help to improve air quality. | TRUE | FALSE |
| 8) We can go to http://airnow.gov to obtain the daily Air Quality Index/Forecast. | TRUE | FALSE |
| 9) If we do not check the air quality forecast, it will help us to make informed decisions about playing outdoors during the summer. | TRUE | FALSE |
| 10) Contamination of air, water, or soil is good for the environment and our health. | TRUE | FALSE |
| 11) Riding our bicycles to school, work, or other places improves air quality because emissions from cars are reduced. | TRUE | FALSE |
| 12) Properly inflated tires do not increase vehicle performance and reduce emissions. | TRUE | FALSE |
| 13) Clean air helps us live a healthy life. | TRUE | FALSE |
| 14) Carpooling helps to reduce vehicle emissions. | TRUE | FALSE |
| 15) The emissions from idling vehicles do not pollute the air. | TRUE | FALSE |
| 16) Bringing lunch to work improves air quality because emissions from driving cars are reduced. | TRUE | FALSE |

5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30	31	

A child's drawing of a road scene. On the left, there are buildings with windows, some colored brown and some yellow. A road with yellow dashed lines runs through the center. A red car is driving away, and a blue car is driving towards the viewer, emitting a white cloud of smoke. On the right, a person is standing on a brown signpost with an arrow pointing up. A speed limit sign with the number 35 is visible. The background is green, representing grass or trees.

Particle pollution can occur near roadways, from industry and even from forest fires!

Beware of the particles in the air!

Across

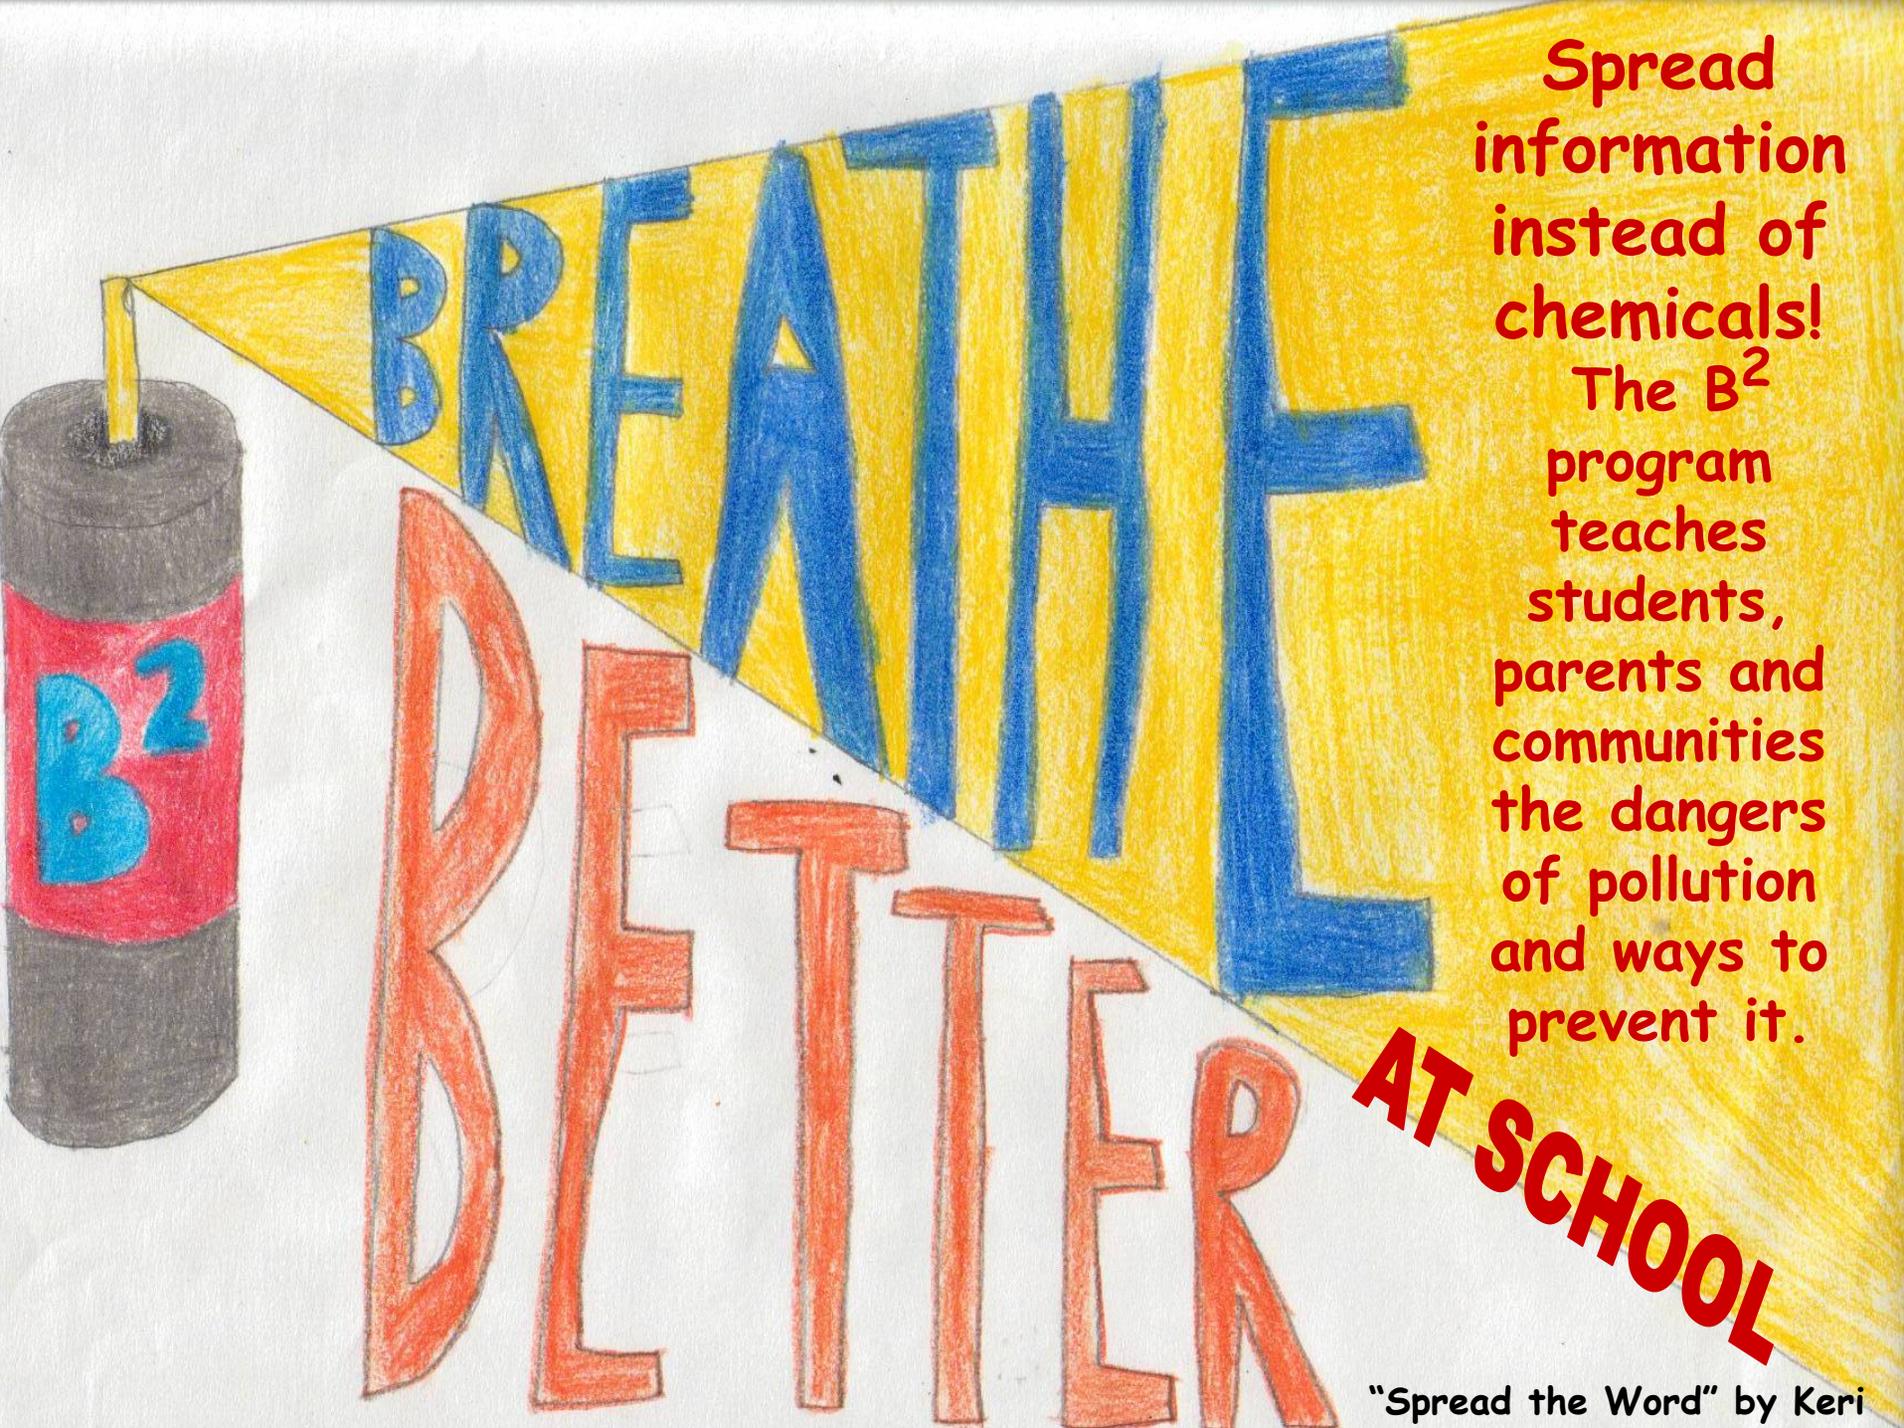

1. Place where products are manufactured (plural).
5. We can prevent them by not burning materials.

Art class students at Fountain Inn Elementary School (Fountain Inn, South Carolina) designed the monthly art work on this calendar.

USEPA provided funding to print this calendar through grant No. XA96453606-0.
