

South Greenville Fire District

Capital Improvement Projects

&

15 - Year Plan

Purpose of Strategic Planning

The purpose of strategic planning is to set overall goals for the Fire District and to develop a plan to achieve those goals. This process involves stepping back from the day-to-day operations and asking where we are headed and how we will get there. Succession planning is a huge part of our strategic plan for the future with the inclusion of those that will one day lead our organization. This plan is a living and breathing document and must be re-evaluated on an as needed basis. Our Command Staff is constantly thinking and re-adjusting our plan as needed to accommodate for district growth and other factors.
