

APPROVAL OF OLD PLATS

EFFECTIVE: August 1, 2026

Subdivision Administration is required to review plats for accordance with Greenville County Land Development Regulations under current conditions. Plats that were created at a prior date may not be approved if any information on the plat is not current or accurate. This includes a change in subject or adjoining property owner information, a change in subject or adjoining property lines, or road name change. Proposed changes are to be compared with information present in GIS, Real Property Service search, and the information provided by the applicant.
