

Judith F. Wortkoetter, PE
County Engineer
Land Development Division
(864) 467-4610

April 5, 2017

Announcement

It has recently come to our attention that State Law H3774 which allowed for the extension of permits valid on December 31, 2012 ended December 31, 2016 instead of at the end of this year as an earlier version of the bill allowed.

Therefore, all permits which were issued only a two year permit before April 1, 2015 have expired and must either renew or provide the required close out documents.

Additionally groups of permits issued before July 2015 will expire within the next three months and must also begin the renewal process or work towards closeout.

We will be sending letters to the Primary Permittees, providing them with direction as to which option they have available to them.

The OPTIONS include:

- All activities have been completed according to the approved plan and project close out papers are required to be submitted ASAP;
- Conditions have not been met to allow closeout and must renew; or
- The project can either be close out or renewed.

To renew the permit, the Engineer of Record is requested to:

- Go onto the portal and chose the Project Renewal option
- Fill in application
- Update the Project Information Form
- Check for \$1900 (payable to Greenville County)
- One original approved plan
