

LARGE PARCELS

EFFECTIVE: August 1, 2026

All Simple or Exempt Plats presented at the Subdivision Administration Counter must show the entire parcels being affected on the survey. In a case that a large parcel is a part of a recombination plat or subdivision plat, the whole parcel must be shown on the survey. If there already exists a survey of the parcel, then the new survey may provide a reference to that plat along with the remaining acreage in lieu of a new survey of the entire parcel.
