

STRUCTURES SHOWN ON PLATS

EFFECTIVE: August 1, 2026

Please be advised: plats to be approved with Subdivision Administration are meant to be accurate as of the time of recording. In an effort to maintain continuity, proposed structures should not be present on plats unless a building permit has been issued and approval of the plat is contingent upon the new structure's existence. Structures that currently exist with the intent to be removed must be accompanied by an active and complete demolition permit number.
