

2011-01 PENNINGTON ROAD CULVERT DESIGN

PROJECT SCOPE

Pennington Road is a Collector Road, approximately 5,085 feet long that runs from Highway 101 to Mays Bridge Road. Design for Phase I improvements from Hwy 101 to Shore Vista Lane (3,745 feet) is currently underway. Phase II improvements will be from the intersection of Mays Bridge Road to Shore Vista Lane for a length of approximately 1,340 feet. The scope of work for Phase II will include but not be limited to designing improvements for the roadway/shoulder/ditches from Mays Bridge Road to Shore Vista Lane and performing all design, hydrological analysis and permitting necessary to replace the existing culvert at the creek crossing near the intersection of Pennington and Shore Vista Lane. Survey at the creek crossing and preliminary hydrology work are currently being performed. The new structure must satisfy County Floodplain Ordinance requirements.
