

Frequently Asked Questions:

Are there vaccination requirements for my dog to participate in the race?

Dogs are required to have standard vaccinations for rabies, Parvo and Kennel Cough.

Does my dog have to be a certain age to race?

For the safety of your dog and others, no dogs under 4 months of age will be permitted to race. Puppies under 4 months are not old enough to have had the proper vaccinations for them to safely socialize with other dogs.

Can I bring my young child to the race?

Children are welcome to participate in the race as long as they are properly supervised by a parent and they have paid the registration fee. Any child who will be running in the race (will not be carried by a parent) must pay the registration fee (after all, it's for charity!).

Can I let my dog off its leash?

Dogs must remain on a leash no longer than 6 feet at all times. Retractable leashes are discouraged. After the race, you may take your dog over to the Conestee Dog Park area, where they are free to roam off-leash.

What should I bring?

There will be 1 water station along the course that you will pass by twice and one at the finish. If you expect you or your dog to need more water during the race, we suggest you bring water along with you.

There will be poop stations at the park, however, you may want to bring along a few bags of your own to be used while you're on the course.
