

Plant provided a trunk line is extended to the site. A line would have to be extended approximately 4200 feet to service this property.

Gas - Piedmont Natural Gas lines are located on Highway 14 and Smith Drive. These lines can be extended to the site to provide adequate gas services. A feasibility study would have to be prepared by Piedmont Natural Gas in order to determine the feasibility of extending gas lines to Rolling Green Village. If the developer wishes, it may subsidize the extension of gas lines to Piedmont Natural Gas.

Electricity - Both Duke Power and Laurens Electric Cooperative supply power to the Garlington Road area. At present it is undetermined as to which company has jurisdiction over this site. An on-site inspection would be required to determine proper jurisdiction.

Fire Protection - This site is located in the Boiling Springs Fire District. The nearest fire station is located approximately 1 mile from the site at the intersection of I-85 and Pelham Road. Based upon information supplied to the Boiling Springs Fire District, adequate fire protection could be provided to this development.

Solid Waste - Solid waste services are not provided in this area. Garbage pick up would have to be under a
