

1980 to 1985 is approximately 50,000 people representing 18% growth over the next five years.

A second economic indicator which was studied was personal income. It was felt that a study of personal income would give indications of the potential purchasing powers of county residences in the future. Table II is a forecast of total personal income.

Table II  
Personal Income  
Greenville County

Year	Total personal Income (Million \$)	Greenville as percent of U. S.
1970	844	89
1975	1360	88
1980	2200	95
1985	3600	98
1990	5900	103
1995	8700	103
2000	12700	103

Source: The Economy of Greenville County, Lawrence H. Shaw

Table II points to a rising rate of income through the year 1990 at which time it is expected to level off. As the level of income rises over the decade, the ability of residents of Greenville to afford housing will correspondingly increase.
