

Quick Start Guide: Attorneys

Using the Camera Doc (Solution Cam):

To present physical documents, place the document under the Solution Cam. When ready, select **Attorney Left/Right Doc Cam** on the *Crestron* control panel. The judge will receive your request.

Camera Doc – Understanding the Buttons:

Zoom In +ZOOM	Zoom Out -ZOOM	Freeze the image in place FREEZE
Auto Focus On/Off AF/FOCUS	Document Camera Light On/Off 	Control Panel Shift On/Off 

HDMI Adapters:

4 Adapters are provided at each table to connect to HDMI if your device doesn't have an HDMI port. These are the provided adapters:

- 1x Apple ONLY USB Type-C/ Thunderbolt Adapter
- 1x Apple Lightning Adapter
- 1x DisplayPort Adapter
- 1x Mini DisplayPort Adapter

HDMI ADAPTERS

Present Using HDMI

To present electronic documents, plug in your device only when you are ready to present. Plug either the HDMI cable into your device directly or if you don't have an HDMI port, choose an adapter to connect the HDMI cable to your device.

When you have the document ready to present, select **Attorney Left/Right HDMI** on the *Crestron* control panel. The judge will receive your request.

Switching from Camera Doc to HDMI (and vice versa)

If you are presenting documents one way and wish to present a different way, you must select the other option on the *Crestron* control panel for the judge to receive the new request.

For instance, if you are presenting electronic documents using the option **Attorney Left/Right HDMI** and wish to present physical documents using the camera doc, you must select **Attorney Left/Right Doc Cam**.

*Attorneys may connect to the Internet via Wi-Fi using **Court Access** (password: ThisWillChange123) or by Ethernet (please see Courtroom Clerk or Bailiff for Ethernet cables).*
